SECTION THREE

PROVERBS

A bad beginning makes a good ending.
A bad excuse is better than none at all.
A bad husband cannot be a good man.
A beggar can never be bankrupt.
A bird in the hand is worth two in the bush.
A burnt child dreads fire.
A cat may look at a king.
A cheerful look makes a dish a feast.
A cheerful wife is the joy of life.
A clear conscience is a coat of mail.
A drowning man will catch at a straw.
A drunkard's purse is a bottle.
A fault confessed is half redressed.
A fool and his money are soon parted.
A fool may give a wise man counsel.
A fool may make money, but it takes a wise man to spend it.
A friend in need is a friend indeed.
A friend is easier lost than found.
A friend's frown is better than a fool's smile.
A full purse makes the mouth to speak.
A good dog deserves a good bone.
A good horse seldom needs the spur.
A good husband makes a good wife.
A good name is better than riches.
A good name is sooner lost than won.
A great talker is a great liar.
A guilty conscience needs no accuser.
A hungry man is an angry man.
A heavy purse makes a light heart.
A man in debt is caught in a net.
A man is as old as he feels.
A man's house is his castle.
A miss is as good as a mile.
A penny for your thoughts.
A penny saved is a penny gained.
A pound of care won't pay an ounce of debt.

A rolling stone gathers no moss.
A rose between two thorns.
A short cut is often a wrong cut.
A stitch in time saves nine.
A thing begun is half done.
A wise man changes his mind sometimes, a fool never
A wonder lasts nine days.
A word to the wise is enough.
Absence makes the heart grow fonder.
Action speaks louder than words.
Advice when most needed is least heeded.
After a storm comes a calm.
All covet, all lose.
All that glisters in not gold.
All work and no play makes Jack a dull boy.
All play and no work makes Jack a mere toy.
All's fair in love and war.
All's fish that comes to his net.
All's well that ends well.
Among the blind the one-eyed man is king.
An apple a day keeps the doctor away.
An army marches on its stomach.
An empty bag will not stand upright.
An idle brain is the devil's workshop.
An old bird is not to be caught with chaff.
An ounce of discretion is worth a pound of wit.
An ounce of a prevention is worth a proud of cure.
Any port in a storm.
Appetite comes with eating.
As a man lives so shall he die.
As well be hanged for a sheep as a lamb.
As you make your bed so you must lie on it.
As you sow, so you shall reap.
Ask much to get little.
Avoid evil and it will avoid thee.
Back again, like a bad penny.
Barking dogs seldom bite.
Be just before you are generous.
Be not the first to quarrel, nor the last to make it up.
Be sure before you marry, of a house wherein to tarry.

Beggars must not be choosers.
Better be alone than in ill company.
Better late than never.
Better be happy than wise.
Between the devil and the deep blue sea.
Birds of a feather flock together.
Blood is thicker than water.
Books and friends should be few and good.
Borrowing thrives but once.
Boys will be boys.
Brevity is the soul of wit.
Bullies are generally cowards.
By other's faults wise men correct their own.
By timely mending save much spending.
Call a spade a spade.
Care killed the cat.
Catch not at the shadow and lose the substance.
Catch the bear before you sell his skin.
Catch who catch can.
Charity begins at home but should not end there.
Cheapest is dearest.
Children are what you make them.
Christmas comes but once a year.
Comparisons are odious.
Courtesy costs nothing.
Curses are like chickens, they come home to roost.
Cut your coat according to your cloth.
Dead men tell no tales.
Delays are dangerous.
Devil takes the hindmost.
Diligence is a great teacher.
Discretion is the better part of valour.
Distance lends enchantment to the view.
Do as I say, not as I do.
Do not cut off your nose to spite your face.
Do not put all your eggs in one basket.
Do not count your chickens before they are hatched.
Do not spur a willing horse.
Do not tell tales out of school.
Early to bed and early to rise,

Makes a man healthy, wealthy and wise.
Easier said than done.
Eat to live, but do not live to eat .
Employment brings enjoyment.
Empty vessels make the most noise.
Enough is as good as a feast (to one that's not a beast).
Enough is better than too much.
Every ass loves to hear himself bray.
Every cloud has a silver lining.
Every dog has his day.
Every little helps.
Every man has his price.
Every man for himself and God for us all.
Every man must carry his own cross.
Every man has his weakness.
Every why has a wherefore.
Everyone can find fault, few can do better.
Everyone knows best where the shoe pinches.
Everyone thinks his own burden the heaviest.
Everyone thinks he is best able to advise others.
Everything comes to those who wait.
Example is better than precept.
Exchange is no robbery.
Experience teaches.
Experience keeps a dear school, but fools will learn in no other
Extremes are dangerous.
Facts are stubborn things.
Failure teaches success.
Faint heart never won a fair lady.
Fall out with a friend for a trifle.
Familiarity breeds contempt.
Fancy kills and fancy cures.
Fine feathers make fine birds.
Fingers were made before forks.
Fire is a good servant but a bad master.
First come first served.
Flattery brings friends, truth enemies.
Flies are easier caught with honey than with vinegar.
Follow the river and you will find the sea.
Fools build houses and wise men buy them.

Forewarned is forearmed.
Fortune favours the brave.
Fortune favours fools.
Genius is a capacity for taking trouble.
Give a dog a bad name and hang him.
Give a fool rope enough and he will hang himself.
Give and spend and God will send.
Give everyone his due.
Give him an inch and he'll take an ell.
Give the devil his due.
God helps those who help themselves.
God never shuts one door but he opens another.
Good beginnings make good endings.
Good to begin well, better to end well.
Good wine needs no bush.
Grasp all, lose all.
Gratitude is the least of virtues, ingratitude the worst of vices.
Great haste makes great waste.
Great minds think alike.
Great profits, great risks.
Great talkers are little doers.
Habit is second nature.
Hail fellow, well met.
Half a loaf is better than no bread.
Hasty climbers have sudden falls.
He giveth twice that gives in a trice.
He is idle that might be better employed.
He is richest that has fewest wants.
He knows most who speaks least.
He knows which way the wind blows.
He laughs best that laughs last.
He runs with the hounds and hunts with the hare.
He that by the plough would thrive,
 Himself must either hold or drive.
He that comes first to the hill, may sit where he will.
He that doth lend doth lose his friend.
He that goes-a-borrowing, goes a-sorrowing.
He that knows little soon repents it.
He that knows nothing, doubts nothing.
He that loves glass without G,

Takes away L, and that is he.
He that will eat the kernel must crack the nut.
He that will not when he may,
 When he will he shall have nay.
He that will thrive must rise at five,
 He that hath thriven may lie till seven.
He who ceases to pray ceases to prosper.
He who likes borrowing dislikes paying.
He's no man who cannot say "No".
His bark is worse than his bite.
His heart is in his boots.
Home is home, though it never be so homely.
Honest men marry soon, wise men not at all.
Honesty is the best policy.
Hope springs eternal in the human breast.
Hunger is the best sauce.
If a man deceive me once, shame on him; if twice, shame on me.
If fools went not to market bad wares would not be sold.
If the cap fits, wear it.
If the mountain will not go to Mahomet, Mahomet must go to the mountain.
If wishes were horses, beggars might ride.
If you cannot make a man think as you do, make him do as you think.
If you wish for peace, prepare for war.
Ill got, ill spent.
In for a penny, in for a pound.
It is a god horse that never stumbles, and a good wife that never grumbles.
It is a long lane that has no turning.
It is always time to do good.
It is an ill wind that blows nobody good.
It is easier to get money than to keep it.
It is easier to pull down than to build.
It is easy to be wise after the event.
It is folly to live in Rome, and strive with the Pope.
It is never too late to mend.
It is no use crying over spilt milk.
It never rains but it pours.
It takes two to make a quarrel.
Jack of all trades and master of none.
Kill not the goose that lays the golden eggs.
Kill two birds with one stone.

Kind words are worth much and cost little.
Kindle not a fire that you cannot put out.
Kindness begets kindness.
Kissing goes by favour.
Knowledge is power.
Lazy people take the most pains.
Learning makes the wise wiser, but the fool more foolish
Least said, soonest mended.
Lend only what you can afford to lose.
Let bygones be bygones.
Let sleeping dogs lie.
Let the cobbler stick to his last.
Liars should have good memories.
Life is never one sweet song.
Life father, like son. Like mother, like daughter.
Little boats must keep the shore,
 Larger boats may venture more.
Little strokes fell great oaks.
Live and let live.
Live not to eat, but eat to live.
Loans and debts make worries and frets.
Look before you leap.
Lost time is never found.
Love is blind.
Make every bargain clear and plain,
 That none may afterwards complain.
Make hay while the sun shines.
Make short the miles, with talk and smiles.
Man proposes, God disposes.
Manners maketh man.
Many find fault without an end,
 And yet do nothing at all to mend.
Many hands make light work.
Many straws may bind an elephant.
Marry in haste, repent at leisure.
Masters two, will not do.
Men are as old as they feel; women as old as they look.
Men make houses, women make homes.
Misfortunes never (seldom) come singly.
Money makes the mare to go.

More haste, less speed.
Much cry, little wool. (Great cry, little wool.)
Murder will out.
Nature abhors a vacuum.
Nearest is dearest.
Necessity hath no law.
Necessity is the mother of invention.
Needles and pins, needles and pins,
 When a man's married then trouble begins.
Neither wise men nor fools can work without tools.
Never a rose without thorns.
Never cross the bridge until you have come to it.
Never damn the bridge that you have crossed.
Never do things by halves.
Never hit a man when he's down.
Never look a gift horse in the mouth.
Never put off till tomorrow what may be done today.
Never say die! Up man, and try.
Never spoil the ship for a ha'p'orth of tar.
Never too old to learn; never too late to turn.
Never trouble trouble till trouble troubles you.
New brooms sweep clean.
No gains without pains.
No living man, all things can.
No man is indispensable.
No man is without enemies.
No news is good news.
No-one knows where the shoe pinches but he who wears it.
None so blind as those who will not see.
None so deaf as those who will not hear.
Nothing succeeds like success.
Nothing venture, nothing have—win.
Oaks fall when reeds stand.
Of one ill come many.
Of two evils choose the less.
Old age is a heavy burden.
Old birds are not caught with chaff.
Old wounds soon bleed.
On a long journey even a straw is heavy.
One can live on a little, but not on nothing.

One cannot die twice.
One fool makes many.
One good turn deserves another.
One may lead a horse to water, but twenty cannot make him drink.
One man's meat is another man's poison.
One may sooner fall than rise.
One swallow does not make a summer.
One today is worth two tomorrows.
Other fish to fry.
Out of debt, out of danger.
Out of sight, out of mind.
Out of the frying, pan into the fire.
Penny wise, pound foolish.
Pigs grow fat where lambs would starve.
Plaster thick, some will stick.
Practice makes perfect.
Practise thrift or else you'll drift.
Praise makes good men better and bad men worse.
Presents keep friendships warm.
Prevention is better than cure.
Pride and poverty are ill, yet often dwell together.
Pride must (or will) have a fall.
Pride goes before a fall.
Procrastination is a thief of time.
Punctuality is the soul of business.
Punctuality is the politeness of princes.
Put not your trust in money; put your money in trust.
Put your own shoulder to the wheel.
Quick believers need broad shoulders.
Rats desert a sinking ship.
Reckless youth makes rueful age.
Rome was not built in a day.
Rumour is a great traveler.
Save me from my friends.
Saying is one thing, doing another.
Scratch my back and I will scratch yours.
Second thoughts are best.
See a pin and let it lie,
 You're sure to want before you die.
Seeing is believing.

Set a thief to catch a thief.
Set not your loaf in till the oven is hot.
She's the cat's mother.
Show me a liar and I'll show you a thief.
Silence gives consent.
Sink or swim.
Six of one and half a dozen of the other.
Skill is stronger than strength.
Sloth makes all things difficult, but industry all easy.
Slow and steady wins the race.
Slow and sure.
Small beginnings make great endings.
Soft words break no bones.
Soft words win hard hearts.
Some men are wise and some are otherwise.
Sometimes the best gain is to lose.
Soon hot, soon cold.
Sooner said than done.
Spare the rod and spoil the child.
Speak little but speak the truth.
Speak well of your friends, and of your enemy nothing.
Speaking without thinking is shooting without aim.
Speech is silver, silence is golden.
Spilt salt is never all gathered.
Still water runs deep.
Strike while the iron's hot.
Study the past if you would divine the future.
Suspicion is the bane of friendship.
Sympathy without relief is like mustard without beef.
Take care of the pence and the pounds will take care of themselves.
Talk of the devil and he'll appear.
That which is evil is soon learnt.
That which proves too much proves nothing.
The best of friends must part.
The biter bit.
The cat is fain the fish to eat, but hath no will to wet her feet.
The cheapest comes the dearest in the end.
The child is father of the man.
The company makes the feast.
The darkest hour is nearest the dawn.

The devil lurks behind the cross.
The early bird catches the worm.
The end justifies the means.
The exception proves the rule.
The fountain is clearest at its source.
The game is not worth the candle.
The goat must browse where she is tied.
The habit does not make the monk.
The heart sees further than the head.
The last straw breaks the camel's back.
The less people think, the more they talk.
The love of a woman and a bottle of wine
 Are sweet for a season but last for a time.
The master's eye fattens the horse.
The morning sun never lasts the day.
The nearer the church the further from God.
The proof of the pudding is in the eating.
The public pays with ingratitude.
The receiver is as bad as the thief.
The stone that lieth not in your way need not offend you.
The strength of a chain is its weakest link.
The tongue ever turns to the aching tooth.
The unexpected always happens.
The wise make jests and the fool repeats them.
The wish is father to the thought.
The world is a staircase; some are going up, some are coming down.
There are as good fish in the sea as ever came out of it.
There are more foolish buyers than foolish sellers.
There are two sides to every question.
There could be no great ones if there were no little.
There is a "But" in everything.
There is no true love without jealousy.
There is no venom like that of the tongue.
There is a salve for every sore.
There's many a slip 'twixt the cup and the lip.
There's safety in numbers.
They who only seek for faults find nothing else.
Those who do nothing generally take to shouting.
Those who live in glass houses should not throw stones.
Those who make the best use of their time have none to spare.

Time and tide wait for no man.
Time cures more than the doctor.
Time flies.
Time is money.
Time is the best counselor.
Tit for tat is fair play.
To be born with a silver spoon in the mouth.
To err is human; to forgive divine.
To forget a wrong is the best revenge.
To kill two birds with one stone.
To know the disease is half the cure.
To look for a needle in a haystack.
To make one hole to stop another.
To make two bites at one cherry.
To put the cart before the horse.
To scare a bird is not the best way to catch it.
To stir up a hornet's nest.
To take the chestnut out of the fire with the cat's paw.
Too many cooks spoil the broth.
Too much of one thing is good for nothing.
Train a tree when it is young.
Tread on a worm and it will turn.
True love never grows old.
True lover= never runs smoothly.
Trust but not too much.
Trust dies because bad pay poisons him.
Turn over a new leaf.
Two eyes see more than one.
Two heads are better than one.
Two is company, three is none.
Two is company, three is a crowd.
Two wrongs do not make a right.
Throw a sprat to catch a whale.
Undertake no more than you can perform.
Uneasy lies the head that wears a crown.
Union is strength.
Vice is its own punishment, virtue its own reward.
Walls have ears.
Wash your dirty linen at home.
Waste makes want.

Waste not, want not.

We are such stuff as dreams are made on.

We can live without our friends, but not without our neighbours.

Wedlock is like a place besieged; those within wish to get out, those without wish to get

in.

Well begun is half done.

What belongs to everybody belongs to nobody.

What can't be cured must with patience be endured.

What cost nothing is worth nothing.

What's done can't be undone.

What is learnt in the cradle lasts to the tomb.

What is one man's meat is another man's poison.

What is sauce for goose is sauce for the gander.

What is worth doing at all is worth doing well.

What man has done man can do.

Whatever you are be a man.

What the eye does not admire the heart does not desire.

What the eyes don't see the heart does not grieve for.

What the heart thinketh the tongue speaketh.

When a man is going down the hill everyone will give him a push.

When in Rome do as the Romans do.

When money's taken freedom's forsaken.

When poverty comes in at the door love flies out of the window.

When rogues fall out honest men come into their own.

When the cat is away the mice will play.

When the wine is in, the wit is out.

When thy neighbour's house doth burn, be careful of thine own.

When two friends have a common purse, one sings and the other weeps.

When wits meet sparks fly out.

Where ignorance is bliss, 'tis folly to be wise.

Where there is nothing to lose there is nothing to fear.

Where there is smoke there is fire.

Where there's a will there's a way.

While there is life there is hope.

While the grass grows the horse starves.

Who chatters to you will chatter of you.

Who judges others condemns himself.

Who knows most says least.

Who spends more than he should, shall not have to spend when he would.

Who will not hear must be made to feel.
Who will bell the cat?
Whom the gods love die young.
Willful waste makes woeful want.
Wine and wenches empty men's purses.
Words are wind, but blows are unkind.
You cannot eat your cake and have it.
You cannot get blood out of a stone.
You cannot make a silk purse out of a sow's ear.
You cannot see the wood for the trees.
You cannot shoe a running horse.
You cannot teach old dogs new tricks.
You never know till you have tried.
Young men think old men fools; old men know young men to be so.
Youth and age will never agree.
Youth lives on hope, old age on remembrance.
Zeal without knowledge is a runaway horse.

SECTION FOUR

SMALL WORDS FOR BIG ONES

This section has been put into this book simply to provide mental recreation, and to help those who are interested in word games.

It is well to emphasise, however, that it is generally better to use the small rather than the big word, both in speaking and in writing.

Big word.....	Small word	Big word	Small word

SECTION EIGHT

SOME GEOGRAPHICAL FACTS WORTH REMEMBERING

The earth: The earth on which we live is shaped like a ball; yet it is not quite round, being a little flattened at the poles and bulging slightly the equator.

The axis of the earth is an imaginary line passing through its cent from pole to pole.

There are two poles—the North Pole and the South Pole.

The equator is an imaginary line drawn round the earth, midway between the two poles.

The circumference of the earth is approximately 39 900km (248miles). The diameter of the earth is roughly 12 900 km (8 000miles)

The solar system: The sun is fixed, and moving around the sun are number of large spheres called planets. The earth on which we live one of those planets. Our moon is also a planet. Some of the oath planets are Mercury, Venus, Mars, Jupiter, Saturn, Uranus and Neptune. The sun and all the planets around it are called the socil system.

The sun is 150 million km (93 million miles) away from the earth.

The moon is about 386 000 km (240 000 miles) away from the earth.

Motions of the earth: The earth has two motions: (a) diurnal or daily and (b) annual or yearly.

Diurnal or daily motions: The earth rotates or turns on its axis from west to east once in twenty-four hours. This is called the rotation of the earth. Rotation of the earth causes day and night. When that side of the earth on which we live is turned towards the sun, we have day; but when it is turned away from the sun we have night.

The annual or yearly motion: The earth turns not only on its axis also moves around the sun along an almost circular path called its Orbit. This journey of the earth around the sun is called the revolution of the earth and it takes $365\frac{1}{4}$ days. Leaving out the $\frac{1}{4}$ day our ordinary year consists of 365 days; but at the end of every four years the four quarter-days are added to the ordinary year to make a leap year of 366 days.

Seasons: The axis of the earth is inclined at an angle of $66\frac{1}{2}$ degree to the plane of its orbit. As a result of this the earth is in different positions as it makes its journey round the sun. The annual motion of the earth, on its inclined axis, therefore causes the four seasons of Spring, Summer, Autumn and Winter.

On 21 March the sun is overhead at the equator. It is then Spring in the North Temperate zone.

On 21 June when the sun is overhead at the Tropic of Cancer, places in the North Temperate zone have Summer.

On 23 September the sun is back on the Equator and the North Temperate zone has the season of Autumn.

On 21 December the sun is at the Tropic of Capricorn. Then the North Temperate zone has Winter.

In the South Temperate Zone the seasons are the reverse of those mentioned above at the same time of the year.

Equinoxes or equal nights (and consequently equal days) are the times when the sun is shining directly overhead at the Equator. 21 March is called the Vernal Equinox; 23 September is called the Autumnal Equinox.

Solstices are the times when the sun is overhead at the Tropics of Cancer and Capricorn and seems to stand for a little while before moving back in

the direction of the Equator. 21 June is called the Summer Solstice, 21 December is called the Winter Solstice.

Distance: In order to enable us to calculate the distance between one place and another a number of circles are drawn round the globe. Every circle is divided into 360 degrees and each degree is approximately 112 km (69 1/2 miles).

Lines of latitude and longitude enable us to measure distances on a map, or to find the position of any place on a map.

Latitude is distance, measured in degree, north or south of the Equator.

Longitude is distance, measured in degrees, east or west of a given meridian.

Meridians or mid-day lines drawn on a map from the North Pole to the South Pole, and all places on any one of these lines have mid-day at the same time.

The Prime Meridian passes through Greenwich. East longitude is up to 180 degrees east of Greenwich. West longitude is up to 180 degrees west of Greenwich.

THE FIVE CHIEF PARALLELS OF LATITUDE ARE:

The Equator marked 0 degrees

The Tropic of Cancer 23 1/2 degrees north of the Equator.

The Tropic of Capricorn 23 1/2 degrees south of the Equator.

The Arctic Circle 66 1/2 degrees north of the Equator.

The Antarctic 66 1/2 degrees south of the Equator.

TEMPERATURE BELTS OR ZONES

The above-named parallels of latitude divide the earth into five belts or zones corresponding to different kinds of climate.

- (a) The North Frigid Zone from the Arctic Circle to the North Pole.
- (b) The North Temperate Zone between the Tropic of Cancer and the Arctic Circle.
- (c) The Torrid Zone on both sides of the Equator between the Tropic of Cancer and the Tropic of Capricorn.
- (d) The South Temperate Zone between the Antarctic Circle and the South Pole.

- (e) The South Frigid Zone between the Antarctic Circle and the South Pole.

The frigid zones have the coldest climate.

The torrid zone has the hottest climate.

The temperate zones are neither too hot nor too cold.

Time: Parallels of Longitude determine time. The time of a place depends on its longitude east or west of Greenwich. As the earth rotates from west to east, places to the east of Greenwich will come directly under the sun before those places to the west of Greenwich. Now the earth rotates through 360 degrees in twenty-four hours, or 15 degrees in 1 hour, or 1 degree in four minutes. Calcutta is approximately 90 degrees east of Greenwich so that Calcutta will be $\frac{90 \text{ degrees} \times 4}{60}$ = 6 hours in advance of the time

60

in London.

That is to say when it is noon in London it will be 6 p.m. in Calcutta.

Standard Time: As local time is found to vary constantly as one travels some distance from one place to another, there is usually an arrangement by which all places in a certain region or “belt” agree to use the same time. This is called Standard Time.

International Date Line: Meridian 180 degrees E and Meridian 180 degrees W are one and the same line, situated in the Pacific Ocean, near Fiji, Samoa, and Gilbert Islands. In reckoning time from Greenwich to this meridian, it is found that there is a difference of one day between Greenwich to 180 degrees E and Greenwich to 180 degrees W. In order to avoid confusion the International Date Line was agreed upon. Travellers crossing the meridian of 180 degrees from the east add a day, while those from the west subtract a day, from the calendar.

Climate: The climate of a place is its average weather conditions calculated over a long period of time. Climate chiefly depends upon (a) temperature, (b) rainfall.

PRINCIPAL CLIMATES OF THE WORLD

TYPE OF CLIMATE	CHARACTERISTICS	TYPICAL AREAS
A. Hot Climates:		
1. Equatorial.	Always very hot with a temperature of about 27 degrees C. Little range of temperature-about 1-2 degrees. Rainfall throughout the year, 2000-2500mm. Convectional rains. Evergreen forests.	Found stretching in a belt about 5 degrees on either side of the equator. The Congo Basin; Amazon Basin; The East Indies.
2. Savanna or Tropical grasslands.	Hot throughout the year. Rain during the hottest season. A long dry season.	Found to the north and south of the equatorial belt. The Sudan; Venezuela; Mexico; The Orinoco Basin.
3. Monsoon.	Always hot. Heavy rains during the hottest season.	India; Southern China; North Australia.
4. Hot Desert.	Always very hot and dry. Very little rainfall—less than 250 mm. Great range of temp between days and nights--the days are hot, the nights cold.	The desert regions lie on the west of the continents along the Tropics of Cancer and Capricorn in the rain shadow areas, or in the center of huge land masses. Sahara in Africa Kalahari in S. Africa; Ataca- Ma in S.America; Desert of Arabia. Thar or Indian Desert Australia Desert.
B. Temperature Climates:		
5. Mediterranean.	Hot, dry summers; mild, cool, wet winters.	On the west side of the continents between Lat.

		28-40 degrees. The whole region around the Mediterranean Sea; California; Central Chile S.W. Australia; Southern part of the West Coast of South Africa.
6. Trade Wind, or Warm Temperate East Coast.	Hot, wet summers; cool winters Rain at all seasons.	Southern Brazil; S.E. United States, Central and N. China; Natal; Queensland in Australia.
7. Maritime, or Cool Temperate West Coast.	Warm summers; mild, cool winters. Small range of temperature. Rain throughout the year.	British Isles; West Europe; Br. Columbia; Southern Chile; New Zealand; Tasmania.
8. Continental.	Very hot summers; very cold winters. Considerable range of temperature. Rainfall chiefly in summer.	Central Canada; Mid-west U.S.A.; Southern Russia, South Siberia.
9. Temperate Desert.	Dry all through the year. Hot summers, cold winters.	Gobi in Central Asia. Desert of Iran or Persia.

C. Cold Climates:

10. Arctic, or Cold Desert.	Very long bitterly cold winters; very short, cold summers. Very little rainfall.	Lapland; N. Siberia; N. Canada. These regions are in the frigid zones.
11. Alpine, or Mountain.	Perpetual snow on the tops of the mountains.	The Alps in Italy and Switzerland; The Rockies in N.America; The Andes in S. America; The Himalayas in India.

A Natural Region is a part of the earth's surface having certain definite characteristics of climate and of plant and animal life.

Temperature is the degree of heat or cold in the atmosphere as measured by the thermometer. The temperature of a place is determined by (a) latitude, (b) altitude, or height above sea-level, (c) distance from the sea, (d) direction of the prevailing winds, (e) the presence of a cold or warm current, (f) slope of the land.

Wind: Wind is air in motion. The chief cause of winds is the difference in the pressure of the air. Heated air near the earth's surface, being light, rises into the higher regions while cold air from the surrounding regions move into this low pressure area to equalize the pressure of the atmosphere. This movement of the air is known as wind.

Wind blow from areas of high pressure to areas of low pressure.

Winds are named by the direction from which they blow, but the deflection of the winds is due to the rotations of the earth. Winds are deflection to the right in the Northern Hemisphere, and to the left in the Southern Hemisphere.

Winds are divided into three main groups:

1. Regular—e.g. trade winds, westerlies.
2. Periodical—blowing at certain seasons—e.g. monsoons.
3. Variables—e.g. cyclones and other local winds.

Trade Winds: The steady currents of air blowing towards the equator from the north-east and the south-east are known as the Trade Winds. They are so called

because they were of great use to sailing ships, which did the carrying trade of the world before the invention of steamships.

Monsoons are seasonal winds which blow briefly over India, IndoChina, China and North-west Australia. In summer, due chiefly to the winds blow from the sea to the land bringing a great deal of rain. In winter the reverse is the case. A monsoon climate, therefore enjoys summer rains and winter drought.

The Westerlies are regular winds which blow outside of the tropics in the Temperate Zones. The south-westerly winds blow in the Northern Hemisphere and the north-westerly winds in the Southern **Hemisphere**.

South of Latitude 40 degrees the absence of land masses enables these winds to gather great force and thus they are known as **Roaring Forties**.

Chinook are hot, dry winds on the east or leeward side of the Rocky Mountains (Rain Shadow area). As these winds descend from the mountains they are pressed down and become heated. Similar winds on the north of the Alps are called Fohn.

The Sirocco is a hot, moist wind which blows from the Sahara desert across to Italy.

The Solano is a similar wind blowing from the Sahara to the Iberian Peninsula.

The Harmattan is a hot dry wind blowing from the interior of West Africa.

The Mistral is a very cold wind which blows down from the plateau of Central France.

The Bora is a cold, dry wind blowing outwards from Hungary to the north of Italy.

Punas are cold dry winds blowing down on the western side of the Andes.

Cyclones are irregular local winds which swirl round and round a low pressure area. They are chiefly found in latitudes 35 degrees to 60 degrees.

Anticyclones are similar winds swirling round a high pressure centre.

Hurricane: A hurricane is a severe tropical storm which revolves around a centre of low pressure. It travels at a terrific speed, usually between 160 and 240 km per

hour. In approaching the centre it moves in an anti-clockwise direction, and in departing it moves in the opposite direction. In the middle of a hurricane there is usually a lull or calm. The lull occurs when the hurricane has spent about half its force. Then the winds begin to blow in the opposite direction, and the hurricane rages as violently as before for the other half of its life.

A hurricane does considerable damage to life and property. There are many islands in the West Indies which lie in the path of hurricanes. Fortunately, certain warning signs give notice of its approach. There is a rise in the barometer, a fall in the thermometer, and a disappearance of land and sea breezes.

Blizzard is a blinding storm of snow and wind common in the polar regions.

Typhoon is the name given to a cyclone which occurs over the China seas.

Tornadoes are violent cyclonic storms which occur in some parts of the United States and cause great destruction.

Ocean Currents are streams of water crossing the oceans. They follow the direction of the prevailing winds.

Beginning in the Atlantic Ocean, the westerly winds drive the cold **Antarctic Current** eastwards. This turns northwards when it reaches the coast of Africa and is known as the **Benguela Current**. The South East Trade Winds take this current westwards as the **South Equatorial Current**. Off Cape St Roque at the corner of Brazil this current divides into two. One branch flows south-west to become the **Brazilian Current** while the main current continues north-west into the Gulf of Mexico. This South Equatorial Current leaves the Gulf of Mexico and flows north-east as the **Warm Gulf Stream**. It widens over the Atlantic, part flowing as the **North Atlantic Drift** and warming the shores of the British Isles and Northern Europe. The other part turns south at the Canaries under the influence of the North East Trade Winds to join the **North Equatorial Current**. From the Arctic Ocean come the cold **Arctic Current** flowing along the shores of Greenland, and the cold **Labrador Current**. The latter meets the warm Gulf Stream off Newfoundland. The meeting of the cold air and warm air from over these two currents causes great fogs off Newfoundland. (Trace these currents on a map of the world showing currents.)

In the Pacific Ocean the currents are similar to those in the Atlantic but the names are different. The Antarctic Current joins the **Peruvian Current** which is

continued as the South Equatorial Current. Off the East of Australia this current divides into the New South Wales Current which turns south, while the main current continues to become Japan or Kuro Siwo Current—the counterpart of the Golf Stream. When this current turns southwards it becomes the **Californian Current**.

The currents of the north Indian Ocean follow the monsoons. Those of the South Indian Ocean follow the pattern of the Atlantic and Pacific. The most important current in this part of the ocean is the **Agulhas Current**.

Ocean Currents influence climate. Places near to a warm current have a much warmer climate than lands in the same latitude under the influence of a cold current.

Rain: By a process called EVAPORATION the heat of the sun changes much of the water of seas, rivers and lakes into water-vapour.

When this moisture-laden air ascends into the colder higher regions of the atmosphere or is blown there by winds, it becomes cooled, and condensation takes place. The drops of water then unite and fall to the earth as rain.

The chief types of rainfall are convectional, relief, cyclonic.

Dew: During the night the earth cools more rapidly than the air above it. The layers of air nearest the earth therefore become cooled. Condensation takes place and the moisture deposited on the ground, grass and other objects is called dew.

Rainbow: The sun's rays passing through the drops of water in the air are doubly refracted and the human eyes sees the reflection in the form of a brilliant arch of prismatic colours which we call the rainbow. A rainbow is best seen when the rain is falling while the sun is shining.

Clouds are collections of water-vapour on the dust particles in the various layers of the atmosphere. They are usually classified as follows: cirrus (feathery); cumulus (rounded masses); stratus (horizontal sheets); nimbus (rain).

Fogs and Mist are formed when condensation of the water-vapour in the air near the earth's surface takes place upon the dust particles in the air.

“A fog is a cloud resting on the earth; a cloud is a fog floating high in the air.”
(Huxley.)

Snow: If the temperature in the upper layers of the atmosphere falls below freezing-point then the moisture in the air is frozen into little six sided crystals.

These crystals fall to the earth as snow, but only when the temperature over the earth's surface is also near to freezing-point.

Snow Line: The level above which there is always snow.

Hail is caused by the freezing of raindrops as they pass through layers of cold air. Hence hail falls to the ground in showers of little hard pellets.

Eclipse: When the light of the sun or the moon is obscured by another body passing between it and the eye, the sun or moon is said to be in eclipse. The sun is in eclipse when the moon comes between it and the earth. There is an eclipse of the moon when the earth comes between it and the sun.

Land and Sea Breezes: Land heats more rapidly and cools more quickly than the sea.

During the day, therefore, the pressure of the air over the land is lower than that over the sea. Hence breezes blow from the sea to the land.

At night the air over the sea is warmer than the air over the land so that the breeze blows from the land to the sea.

Tides: These are the regular rise and fall of the waters of the ocean. Tides are caused by the attractive force of the sun and moon acting upon the earth and on the moving waters of the ocean. There are two kinds of tides. (a) Spring tides, which are caused by the pulling of the sun and moon together; and (b) Neap tides, which are caused when the sun and moon are at right-angles and pull against each other. There are two Spring tides and two Neap tides every lunar month.

Spring tide is when the highest point of the tide is reached. Neap tide is when the lowest point of the tide is reached.

The flow of the tide is the coming in.

The ebb of the tide is the going out.

Tides ebb and flow twice in 24 hours.

Work of the Tides: Tides alter the shape of the coast line. They form estuaries when they rush up the mouth of a narrow river.

They sometimes form bores, as in the Severn; and capes, as when they bring material and deposit it on the continental shelf e.g. The Cape of Good Hope.

They aid shipping.

Saltiness of the sea: The water of rivers absorbs tiny particles of mineral salts from the earth which eventually reach the sea. In the course of centuries these accumulated deposits have made the sea water salt.

Continental shelf is the name given to the land around the continents which is covered by the sea. The shelf slopes down to a depth of 100 fathoms (183 metres), from which edge there is a steep drop to the bed of the ocean. Continental shelves provide excellent fishing grounds and good harbours.

The earth's crust is composed of rocks which are classified as either (a) igneous, (b) aqueous or sedimentary or stratified, (c) metamorphic.

Volcanoes: A volcano is an opening in the earth's crust out of which steam, gases and molten rocks are hurled with terrific force.

The interior of the earth is very hot. Through cracks in the earth's surface water from the rain, rivers, seas etc., trickles down to the interior of the earth where it boils and is changed into steam. This is kept down by the pressure of the layers of the earth. At certain times the steam forces itself through a fault or a line of weakness in the earth. When this happens an eruption of a volcano is said to have taken place.

Volcanoes may be either active, dormant or extinct.

Geysers are hot springs from which columns of boiling water and steam gush forth at intervals. Geysers are found in regions usually associated with volcanoes. Iceland; The Yellowstone Park in Wyoming, North America; and New Zealand are famous for geysers.

An earthquake is the shaking or movement of the earth. As the interior of the earth cools it solidifies and leaves spaces between the layers of the earth. The crusts of the earth then fall or move to fit themselves on the shrinking interior. When this happens we feel the movements as earthquakes.

Fold mountains are caused by earthquakes and are found along the lines of weakness of the earth.

Block mountains are solid masses of hard resistant rocks which have been able to withstand the movements which cause folding of the earth's surface.

Valleys: When forces working inside the earth cause a block mountain to split, the "rift" thus made is known as a Rift Valley.

When a valley runs parallel to the trend of the mountains it is **Longitudinal**; when it runs across it is **Transverse**.

A **canyon** is a steep-side gully carved out by a river flowing through a rainless region.

Isobars are lines drawn on a map to connect places having equal pressure.

Isotherms are lines drawn on a map to connect places having equal temperature.

Isohyets are lines drawn on a map to connect places of equal rainfall.

Contours are lines drawn on a map to connect places of equal height above sea level.

Shotts is the name of the plateau in North-West Africa between the Atlas Mountains and the Tell.

A **shott** is a shallow lake which becomes dry in the hot season.

Tell: The Tell is the most important region of the Republic of Algeria in North-West Africa. It is fertile coastal strip between the Algerian Plateau and the sea.

Veld: The Veld or High Veld is a rich grassland country in the eastern part of the plateau of South Africa. Most of the Transvaal, the Orange Free State and part of Cape Colony belong to it. Large flocks of sheep are reared on the Veld chiefly for wool.

Steppers are the great temperate grasslands of Southern Russia.

Karroos: The Karroo is a natural region of South Africa between the coastlands and the Plateau. There are two Karroos, the Little Karroo and the Great Karroo. The vegetation in the Karroos is poor and the main industries are sheep farming and ostrich rearing.

Karst is a barren region on the coast of the Adriatic Sea.

Landes are an area of sand dunes on the south coast of France near Bordeaux.

Polders are the areas of land in Holland below sea level which are enclosed by the embankments and dykes. Machinery for pumping water is a feature of the polders.

Cantons: The term used to describe the political divisions of Switzerland.

Water table: The margin of the earth below which the layers of soil are saturated with water.

A tributary is the name given to a stream which empties itself into the main river as it flows to the sea. A tributary is also known as an affluent.

A confluence is the place where a tributary joins the main stream.

A flood plain is a plain which is liable to flooding by the overflowing of a river which has become swollen by heavy rains or melting snows. A flood plain is built up of deposits of fertile alluvial soil left by the river after the floods have subsided.

A waterfall is a steep descent or fall in the flowing of a river. Large waterfalls are called cataracts; smaller ones are known as cascades.

An avalanche is a mass of snow and ice which breaks loose from the snow-clad mountains and slips down the mountain sides with terrific force.

A glacier is a huge sheet of ice formed from compressed snow which glides slowly down the mountain sides or valleys.

A moraine is the name given to the debris after a glacier has melted.

An iceberg is the name given to a large mass of ice floating in the sea. Icebergs are really parts of a glacier which break off and fall into the sea when the glacier reaches the coast unmelted. The bulk of an iceberg submerged, only about one-tenth being visible above the surface of the water.

REVISION NOTES IN ENGLISH

GENDER

Gender is an easy subject, well treated in most grammar books. The student should especially note the following:

The feminine gender is denoted in three ways

- (i) By a suffix, e.g. actor—actress.
- (ii) By a word prefixed to another word, e.g. cock-sparrow; hen-sparrow.
- (iii) By an entirely different word, e.g. drake—duck.

THE POSSESSIVE CASE

The possessive (or genitive) is the case which denotes the owner or possessor, e.g. uncle's bicycle; ladies' hats; children's toys.

The possessive case is very important. Study the following rules.

Rules for forming the Possessive Case

1. The possessive case of nouns is formed by adding 's (apostrophes) to the singular: e.g. The boy's ball; the child's toys; the man's hat.
2. If the plural ends in s the apostrophe only is added, e.g. The boys' ball.
3. If the plural does not end in s then the apostrophe s ('s) must be added: e.g. The children's toys; The men's hats.
4. With abstract nouns ending in ss or ce the apostrophe only is added. These are usually found in such phrases as: for goodness' sake; for righteousness' sake; for conscience' sake.
5. The sign of the possessive is put on the last word of:
 - (a) Compound nouns: e.g. He lives at his father-in-law's house.
 - (b) Nouns followed by a qualifying phrase: e.g. The winner of the race's prize.
6. As regards names note the following: We say Jone's birthday but the Joneses' residence.

HOMONYMS

Most examination papers in English language contain a question on the use of words of similar sound but different in meaning. The question usually takes a form something like the following:

Use these words in sentences to show that you know their meanings:

Aisle	diary	principal	stationary	compliment
Isle	dairy	principle	stationery	complement

A comprehensive list of these words is found in most good spelling books and it is not intended to repeat these here.

It is, however, important for the student to remember that when he is asked to use these words in sentences in order to illustrate their meaning, his sentences should be explicit enough as to leave no doubt in the examiner's mind that the writer knows the exact meaning of the words which he is using.

Take for example the words **stationary**, **stationery**. When used in the following sentences the meaning is not fully brought out.

(a) The bus is stationary. (b) I bought some stationery at the store.

Sentences (c) and (d) however, leave no doubt in the examiner's mind that the writer is fully acquainted with the meaning of the words:

(c) Wait until the bus is **stationary** before attempting to get off.

(d) I will need a good deal of **stationery** to write all these letters.

Note also that it is a good plan to underline the significant word in the sentence.

MYTHOLOGY

Muses: The Muses were the goddesses who presided over the liberal arts. There were nine muses, as follows:

Clio, the muse of history; Calliope, the muse of epic poetry; Euterpe, the muse of lyric poetry; Erato, the muse of love poetry; Melpomene, the muse of tragedy;

Thalia, the muse of comedy; Urania, the muse of astronomy; Terpsichore, the muse of dancing; and Polyhymnia, the muse of psalmody or religious song.

Graces: The Graces were three goddesses representing the perfection of beauty and charm. They were Algaia, Euphrosyne and Thalia.

WEDDING ANNIVERSARIES

Wedding Anniversaries are social events. Here is a complete list of Wedding Anniversaries appropriately named. Those not named are usually giftless Anniversaries. Gifts presented to the celebrating couple by their friends are usually made of materials corresponding to the name of the Anniversary.

1 st year—Paper	8 th year—Bronze
2 nd year—Calico	9 th year—Pottery
3 rd year—Leather	10 th year—Tin
4 th year—Silk or Book, Fruit or Flowers	11 th year—Steel
5 th year—Wood	12 th year—Linen
6 th year—Iron	13 th year—Lace
7 th year—Copper or Brass	14 th year—Ivory

RELIGION

The Decalogue	The Ten Commandments.
Koran	The sacred scriptures of Islam/
Apocrypha	A collection of fourteen books of the Old Testament, not considered genuine by the Jews. The Protestant Churches regard the Apocrypha only as historical records, and it is not included in the authorized version of the Bible. Some of the Books included 1 and 2 Esdras, Tobit, Judith, Esther X-XVI, etc.
Apocalypse	The Book of the New Testament in which the revelation of St John is recorded.
Apocalyptic Number	The mystical number 666 which is mentioned in the Apocalypse.
Canticles	The songs of Solomon.
The Major Prophets	Jeremiah, Ezekiel, Daniel, Isaiah.
Pentateuch	The first five books of the Old Testament, namely, Genesis, Exodus, Leviticus, Numbers and Deuteronomy.
The Golden Rule	“Do unto others as you would have others do unto you.”
Bhagavad-Gita	Hindu sacred scriptures.
Paternoster	The Lord’s Prayer.
Cardinal or Seven deadly sins	Pride, lust, envy, anger, covetousness, gluttony, and sloth.

Millennium The thousand years, according to Revelations 20: 1-5 during which Jesus Christ will rule the world.

SOME PATRON SAINTS

St. George of England, St. Andrew of Scotland, St. Patrick of Ireland, St. David of Wales, St. James of Spain, St. Dennis of France, ST. Anthony of Italy, St. Nicholas of Russia, St. Cecilia of Music, St. Crispin of Shoemakers, St. Pancras of Children, St. Christopher of Travellers.

MISCELLANEOUS

The five Senses or gateways of knowledge are seeing, hearing, feeling, smelling and tasting.

The Four Elements (Ancient) are fire, water, air, earth.

The Dead Languages are Ancient Greek and Latin.

The Three Professions are Divinity, Law, Medicine.

The Lake Poets are Coleridge, Southey, Words worth.

The Latin Races are French, Spanish, Portuguese, Italians.

A Decade is a period of ten years.

A Generation—about thirty years.

A Century—one hundred years.

A Millennium—one thousand years.

Cardinal Numbers are 1, 2,3,4,5 etc.

Ordinal Numbers are 1st, 2nd, 3rd, 4th, 5th etc.

Cardinal Points are North, South, East, West.

Cardinal Signs are Aries, Libra, Cancer, Capricorn.

Cardinal Virtues are (a) Prudence, Temperance, Justice, Fortitude, or (b) Faith, Hope, Charity.

0, 1, 2, 3, 4, 5, 6, 7, 8, 9, so called because they were introduced into Europe by the Arabs.

ARITHMETICAL FORMULAE

- SQUARE:**
- (a) Area of square = Side squared = S^2
 - (b) Perimeter of Square = Side x 4 = $S \times 4$
 - (c) To find the side, Area being given:
Take the square root of the Area
 $\therefore S = \sqrt{A}$

RHOMBUS: Area of Rhombus = base x perpendicular height
= $B \times H$

RECTANGLE:

- (a) Area of Rectangle = Length x Breadth = $L \times B$
- (b) Length of Rectangle = Area / Breadth = $\frac{A}{B}$
- (c) Breadth of Rectangle = Area / Length = $\frac{A}{L}$
- (d) Perimeter of Rectangle = 2 (length + breadth) = $2(L+B)$

PARALLELOGRAM:

Area of Parallelogram = base x perpendicular height = $B \times H$

TRIANGLE:

- (a) Area of Triangle = $\frac{1}{2}$ (base x perpendicular height) = $B \times H$
= $\frac{1}{2} (B \times H)$ or $\frac{B \times H}{2}$
- (b) Height of Triangle = (Area x 2) / base = $\frac{A \times 2}{B}$
- (c) Base of Triangle = (Area x 2) / height = $\frac{A \times 2}{H}$
- (d) To find the Area of a Triangle, the lengths of the three sides being given.

RULE: From half the sum of the three sides subtract each side separately; then find the continued product of the half and the three remainders; finally extract the square root of the product. Thus Area = $\sqrt{s(s-a)(s-b)(s-c)}$
Where s is used to denote half the sum of its sides, and a, b, c, the lengths of the three sides.

THE RIGHT-ANGLED TRIANGLE:

In any Right-Angled Triangle the square on the hypotenuse is equal to the sum of the squares on the other two sides.

- (a) Hypotenuse = $\sqrt{\text{perp.}^2 + \text{base}^2} = \sqrt{p^2 + b^2}$
 (b) Perpendicular = $\sqrt{\text{hypotenuse}^2 - \text{base}^2} = \sqrt{h^2 - b^2}$
 (c) Base = $\sqrt{\text{hypotenuse}^2 - \text{perpendicular}^2}$
 = $\sqrt{h^2 - p^2}$

TRAPEZIUM:

Area = $\frac{1}{2}$ width x (sum of parallel sides) = $\frac{1}{2} w(a+b)$

AREA OF THE FOUR WALLS OF A ROOM

Area of 4 walls = Twice the sum of the length and breadth of the room x height
 = $2(L + B) \times H$

SIMPLE INTEREST:

- (a) Simple Interest = $\frac{\text{Principal} \times \text{Rate} \times \text{Time}}{100} = \frac{P \times R \times T}{100}$
 (b) Principal = $\frac{\text{Interest} \times 100}{\text{Rate} \times \text{Time}} = \frac{I \times 100}{R \times T}$
 (c) Rate = $\frac{\text{Interest} \times 100}{\text{Principal} \times \text{Time}} = \frac{I \times 100}{P \times T}$
 (d) Time = $\frac{\text{Interest} \times 100}{\text{Principal} \times \text{Rate}} = \frac{I \times 100}{P \times R}$
 (e) Amount = Principal + Interest = $P + I$

CIRCLE:

- (a) Circumference of Circle = diameter x π = $d \times \pi$
 or = twice radius x π = $2\pi R$
 (b) Diameter = Circumference / π = $\frac{C}{\pi}$
 (c) Radius = Circumference / 2π = $\frac{C}{2\pi}$
 (d) Area of Circle (when radius is given)
 = Radius squared multiplied by π = πR^2
 (e) Area of Circle (when diameter is given)
 = one quarter of the diameter squared multiplied by π
 = $\frac{\pi D^2}{4}$
 (f) Area of Circle (when circumference is given)
 (i) Divide the square of the Circumference by four times π
 $\frac{C^2}{4\pi}$
 or (ii) Multiply the square of the Circumference by $\frac{1}{4\pi}$

- (g) To find the Radius, area being given

Divide the area by π then extract the square root.

$$= \sqrt{\text{Area} / \pi}$$

- (h) To find the Circumference, area being given

- (i) Multiply the area by four times π then extract the square root.

$$= \sqrt{\text{Area} \times 4 \pi}$$

or (ii) Multiply the area by π , extract the square root, then multiply the results by two.

$$= 2\sqrt{\text{Area} \times \pi}$$

CIRCULAR RING:

To find the Area of a Circular Ring, multiply the product of the sum and difference of the inner and outer radii by π

$$= \pi(R + r)(R - r)$$

CYLINDER:

- (a) To find the Area of Curved Surface of Cylinder, multiply the circumference of the cylinder by the height.

$$\text{Area of Curved Surface} = 2 \pi r \times h$$

- (b) Area of Total Surface of Cylinder

$$= \text{Area of Curved Surface} + \text{Area of ends.} = 2 \pi rh + 2 \pi r^2$$

or multiply the sum of the height and radius by the Circumference

$$= \text{Circumference} \times (\text{height} + \text{radius}) = c(h + r)$$

- (c) Volume of Cylinder = Area of Base x height = $\pi r^2 h$

CONE:

- (a) To find Curved Surface of Cone, multiply the product of radius and slant height by π Curved Surface of Cone = $\pi r l$ (where l denote slant height)

- (b) Area of Total Surface of Cone

$$= \text{Area of Base} + \text{Area of Curved Surface} = \pi r^2 + \pi r l$$

- (c) Volume of Cone = Area of Base x $1/3$ perpendicular height.

$$= \frac{2 \pi r^2 \times h}{3}$$

THE SPHERE:

- (a) Area of Surface of a Sphere = $4 \pi r^2$

- (b) Volume of Sphere = $\frac{4 \pi r^3}{3}$

3

THE PRISM:

- (1) Lateral surface of prism = (perimeter of base) x height.

- (2) The Total surface of prism = lateral surface + area of ends.

(3) Volume of Prism = (area of base) x height.

THE PYRAMID:

- (1) Area of Slant Surface of Pyramid
= $\frac{1}{2}$ (perimeter of base) x slant height.
- (2) Total Surface of Pyramid = slant surface + area of base.
- (3) Volume of Pyramid = $\frac{1}{3}$ (area of base) x height.

RECTANGULAR SOLIDS:

- (a) To find the Area of Surface of a Rectangular Solid, take the sum of the Areas of the six faces. \therefore Total Surface = $2(lb + bh + lh)$ Where l denotes length; b breadth; h height
- (b) Volume of Rectangular Solid = length x breadth x height
= $l \times b \times h$
 - (i) Length of Rectangular Solid = Volume / (base x height)
= $\frac{V}{b \times h}$
 - (ii) Breadth of Rectangular Solid = Volume / (length x height)
= $\frac{V}{l \times h}$
 - (iii) Height of Rectangular Solid = Volume / (length x breadth)
= $\frac{V}{l \times b}$

THE CUBE:

- (a) To find the Total Surface of a Cube, square the length of one side and multiply by 6. \therefore Total Surface = $2(a^2 + a^2 + a^2) = 6a^2$
- (b) Volume of Cube = the cube of the length of the side
= $(a \times a \times a) = a^3$
- (c) To find the side of a cube, volume being given. Take the cube root of the Volume \therefore Side = $\sqrt[3]{V}$

DENSITY OR SPECIFIC GRAVITY:

- (a) Density = $\frac{\text{Weight of Substance}}{\text{Weight of same Volume of Water}}$
- (b) Weight of Substance = Density x weight of the same volume of water as the substance.

SECTION ELEVEN

CIVICS

Civics has been defined as the science of citizenship and municipal government. The study of Civics in schools is intended to help children to become “upright and useful members of the community in which they live and worthy sons and daughter of the country to which they belong.”

THE FUNCTIONS OF GOVERNMENT

The main functions of Government are three in number:

- (a) Legislative—the function of making, altering, amending or repealing laws. This is the work of the Legislature.
- (b) Executive or Administrative—the work of putting the laws into effect, and of administering the country: these functions are performed by the Heads of Departments and other members of the Civil Service.
- (c) Judicial—the function of explaining or interpreting the laws. This work is performed by the Law Courts which are presided over by Judges and Magistrates.

THE RIGHTS OF A CITIZEN

1. Perhaps the greatest privilege of a citizen is his right to share in the government of the country. He can do so directly if he becomes a member of the Legislative, Borough or Country Council, or he can do so indirectly by exercising the franchise to elect suitable representatives to sit on the Councils.
2. In the eyes of the law all citizens are, broadly speaking, equal. Whatever our station in life, whether rich or poor, coloured or white, all of us are liable to punishment in the ordinary courts of law for breaches of the law.
3. Unless he has been suspected of committing a felony a policeman may not arrest a citizen without a warrant.
4. No citizen can be legally punished or deprived of his possession except by the decisions of ordinary courts of law.
5. All citizens enjoy equal protection from the law. The protective hands of the Police Force are there for us all.
6. Every citizen enjoys personal freedom: short of breaking the law he is free to do what he likes. If a citizen is wrongfully deprived of his liberty he can obtain redress by recourse to the law courts.
7. Every citizen has a right to freedom of discussion. This means that he is free to say, write or publish anything he pleases so long as he does not commit a breach of the law.

The law is infringed if he says or publishes anything of a defamatory, seditious, blasphemous, or obscene character.

8. Every citizen has the right to public meeting. People may meet together whenever or wherever they please in so far as they do not offend against the law. They can be apprehended for committing a nuisance, or trespass, or constituting an unlawful assembly. Also, the public have no right to meet in a public thoroughfare, or public resorts.
9. Every citizen enjoys the right of self-defence. He is justified in using a proportionate amount of force in defence of himself, his wife, his children, his house, or his property.

THE RESPONSIBILITIES OF A CITIZEN

1. A citizen's first duty is loyalty to his Ruler or Head of State, and country.
2. It is the duty of the citizen to obey all the laws of the land.
3. Since the revenue of Government is used to defray public expenditure, it is the duty of the citizen to pay all taxes and rates which he has to pay and not try to defraud the revenue.
4. If called upon to help, it is the duty of every citizen to give active aid to the Police in the apprehension of offenders.
5. The citizen must do all in his power to help to suppress a riot, or other outbursts of disorder, or to help repel an invasion.
6. It is his duty to aid the course of justice by giving evidence as a witness in criminal or police cases.
7. He has a responsibility to register the birth of his children soon after they are born, to have them vaccinated, and to see that they receive elementary education.

The above are the legal statutory duties of a citizen, but it must not be supposed that the responsibilities of the citizen end with these. If a citizen faithfully adhered to the above he could be described as a law abiding citizen. If he were apprised of all the information in the foregoing pages he might be considered an informed citizen. But these would not in themselves make him a good citizen.

It is important that the citizen should realize that he lives in a civilized society and that he has certain moral, social and community obligations.

In times like these there is no place for the "lone wolf." Our actions are dependent on the actions of others with whom we have to associate. If, therefore, we wish to be worthy citizens of our country, there are certain principles which we must try to observe. These are: (1) Proper human relationships; (2) Self-Independence; (3) Service to the community; (4) Observance of certain standards of conduct and behaviour.

1. Proper human relationships or the art of living

This is an important element of good citizenship. This calls for (a) consideration for the feelings of others; (b) respect for the other persons' point of view; (c) co-operation.

(a) Consideration for the feelings of others

(i) So many of us want everything for ourselves and our families. Let us remember that other people have as much right to happiness and the good things of this world as we. We should all try to bear one another's burdens by acts of helpfulness when the need arises.

(ii) In the eyes of God all men are equal. Every person, regardless of his station in life has a dignity and importance far greater than the lower animals. He or she is a human being and should be treated as such.

(iii) All of us are proud of the things we do. Let us cultivate a sense of gratitude—the habit of giving due praise and thanks to people for what they do for us, or what they do for others because of us. Little gifts of flowers, Birthday or Christmas cards bring happiness both to the donor and the recipient. Also we must not be too ready to blame others, for we all make mistakes.

(iv) We must try to avoid the bullying, aggressive, scowling and critical attitude in our relations with our friends or subordinates.

(v) We must not be insubordinate to our superiors. Insubordination is distasteful to any employer. It antagonizes him and begets retaliation and victimization. In the long run it is the employee who suffers.

(vi) If we only have a thought to the untold misery which road accidents bring to the homes of so many families, we would all develop a better road sense and observe the Highway Code.

(b) Respect for the other person's point of view

This would be a dull and monotonous world if we all thought alike. It is said that variety is the spice of life. None of us has a monopoly of brains or ideas. We must therefore learn to be tolerant of the views and opinions of others. Don't do all the talking. Listen to what the other persons have to say even if their view on a question is not the same as yours. There may be a lot in what they have to say.

(c) Co-operation

It requires little thought to realize that we have to depend on each other at every turn of our lives. Production under the modern system is based on "division of labour" or "specialization," whereby several kinds of workers have to co-operate to turn out one finished manufactured article. Similarly no one today could be entirely self-sufficient in every respect. Every person has to depend on the labour of other people for certain commodities which he cannot produce himself. Thus

all workers are dependent on others, whether they be agricultural, manual, factory, technical, clerical, administrative or professional workers.

2. Self-independence

It is the duty of the citizen while he has youth, strength and vigour to endeavour to make adequate preparation for himself and his family, so that neither he nor they will become a burden or charge on the community. The best ways to make this preparation are by:

- (a) Being Thrifty: Save all you possibly can. Don't be extravagant in food, dress, or otherwise.
- (b) Self Help: There are many worth-while organizations through which one may help oneself, e.g. Friendly Societies, Credit Unions and Co-operative Societies, Trade Unions.

3. Service to the community

This is one of the noblest duties of the citizen. A number of voluntary organizations such as the Red Cross Society, Child Welfare League, Boy Scout Movement, Girl Guide Movement, Village Councils, Literary and Cultural Clubs etc. offer innumerable opportunities for people to render service to the community. Incidentally, these organizations help to develop in their members the qualities of leadership and a sense of responsibility, just the type of citizen our country needs at the present time.

4. Observance of certain accepted standards of conduct and behaviour

These are legion, but mention is made only of those which are considered most important.

- (a) Good citizens must come from good homes. The love of parents for their children and the affectionate regard of children for their parents are the first marks of a good home. Love, patience, and understanding should exist not only between father and mother but should embrace the entire family.
- (b) Belief in religion: Every religion provides a code of rules to guide its members and to instill in them a sense of right and wrong.
- (c) We owe it to Society to refrain from anything vulgar, indecent or immoral as regards our conduct and manner of dress.

Some don'ts for the young citizen

1. Don't do anything in public which will cause embarrassment or unpleasantness to others. For example, don't spit on the pavement, don't shove your way to the front of a line if you are required to take your place in a queue, don't make uncomplimentary remarks about people as they pass along the street.
2. When speaking to other people—
 - (a) Don't puff the smoke from your cigarette in their faces.
 - (b) Don't monopolize the conversation. Give the other person a chance to say something also.
 - (c) Don't argue about religion. It ends nowhere and usually leaves a lot of bitterness behind.
4. At parties or other social entertainments--
 - (a) Don't take more than a just share. Leave some for the others.
 - (b) Don't sponge. Bear your part of the expenses.

Chief human wants

The primary human wants are:

- (a) Air to breathe.
- (b) Water to drink and for trade and domestic purposes.
- (c) Adequate, wholesome and nourishing food.
- (d) Sufficient clothing to keep us warm and to enable us to conform to the accepted standards of decency.
- (e) Land on which to build our houses.
- (f) A house or shelter to protect us from the sun, wind and rain, and to ensure the privacy necessary for human beings in a civilized society.
